# Human Fc gamma RIIA/CD32a (H167) Protein

Description		
Source	Recombinant Human Fc gamma RIIA/CD32a (H167) Protein is expressed from HEK293 with His tag and Avi tag at the C-Terminus.	
	It contains Ala36-Ile218(H167).	
Accession	P12318-1	
Molecular Weight	The protein has a predicted MW of 23.2 kDa. Due to glycosylation, the protein migrates to 30-40 kDa based on Bis-Tris PAGE result.	
Endotoxin	Less than 1EU per μg by the LAL method.	
Purity	> 95% as determined by Bis-Tris PAGE	
	> 95% as determined by HPLC	
Formulation and Storage		
	Lyaphilized from 0.20 m filtered solution in DBS (nLL 7.4) Narmally 90/ trabaless is added as protestant before	

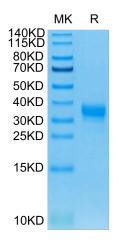

Formulation	Lyophilized from 0.22μm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Centrifuge the tube before opening. Reconstituting to a concentration more than 100 $\mu$ g/ml is recommended. Dissolve the lyophilized protein in distilled water.
Storage	-20 to -80°C for 12 months as supplied from date of receipt80°C for 3 months after reconstitution.Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

**Background** 

The Fc gamma Rs have been divided into three classes based on close relationships in their extracellular domains; these groups are designated Fc gamma RI (also known as CD64), Fc gamma RII (CD32), and Fc gamma RIII (CD16). Each group may be encoded by multiple genes and exist in different isoforms depending on species and cell type.

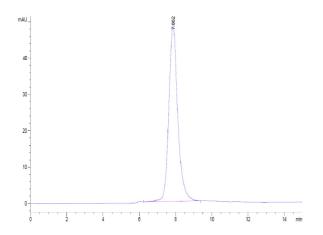

## **Assay Data**

#### **Bis-Tris PAGE**

Human Fc gamma RIIA (H167) on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

#### **SEC-HPLC**

The purity of Human Fc gamma RIIA (H167) is greater than 95% as determined by SEC-HPLC.

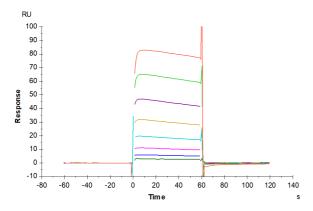

# Human Fc gamma RIIA/CD32a (H167) Protein

Cat. No. CDA-HM432

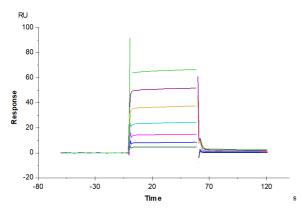

## **Assay Data**

### **SPR Data**

Human Fc gamma RIIA (H167) , His Tag captured on CM5 Chip via anti-his antibody can bind Rituximab with an affinity constant of 1.53  $\mu\text{M}$  as determined in SPR assay (Biacore T200) (QC Test).

# SPR Data

Rituximab captured on CM5 Chip via Protein A can bind Human Fc gamma RIIA (H167), His Tag with an affinity constant of  $0.73~\mu\text{M}$  as determined in SPR assay (Biacore T200).
